

Bug Report

WhatsApp

Reported By: Sai Kiran Somu

Date: 2026-06-17

Document Version: 1.0

1. BUG DETAILS

BUG ID	TITLE	MODULE	SEVERITY	PRIORITY	STATUS	REPRODUCIBILITY
BUG-002	Tapping Suggested Contact Opens Dismissed Contact's Chat	Suggested Contacts / Chat List	High	High	Open	100%

2. ENVIRONMENT

Operating System	Android
Browser	—
Device	Poco M2 Pro
Application Version / Build Tested	v 2.26.22.77

3. SUMMARY

Dismissing one or more suggested contacts updates the UI correctly, but tapping any remaining visible suggestion opens the chat of a previously dismissed contact instead of the selected one.

4. PRECONDITIONS

Provide contacts permissions to WhatsApp, and have less chats in screen. So that you will receive start chatting session, where app suggests contacts to chat.

5. STEPS TO REPRODUCE

1	Open WhatsApp
2	Observe suggested contacts displayed below the chat list
3	Dismiss one or more suggested contacts using the × icon
4	Observe that remaining contacts shift up and display correctly
5	Tap on Chat on any visible suggested contact
6	Observe which chat opens

6. EXPECTED & ACTUAL RESULT

EXPECTED RESULT	ACTUAL RESULT
Tapping on Chat , on visible suggested contact should open that contact's chat	WhatsApp opens the chat of a previously dismissed contact instead

7. INVESTIGATION PERFORMED

Check	Method Used	Result	Finding / Observation
UI State Validation	Manual Observation	Reproduced	UI updates correctly after dismissal but click target remains stale
Reproducibility	Manual Testing	Reproduced	Issue reproducible 100% of the time
Index Mapping Check	Tap Testing	Reproduced	Tapping on chat at position N opens dismissed contact, not visible one

8. BUSINESS IMPACT

Direct Impact	Users are redirected to wrong contacts chats when tapping on chat suggestions
Indirect Impact	Breaks trust in the suggested contacts feature; may cause accidental messages to wrong contacts; privacy concern if sensitive chats are opened unintentionally

9. LEARNING / INVESTIGATION SUMMARY

*	—
---	---

10. POSSIBLE CAUSE (OPTIONAL)

The click handler appears to retain the original index position of contacts before dismissal. When a contact is dismissed and the list re-renders, the UI updates visually but the underlying index mapping is not refreshed — causing a stale reference issue. Possible reasons: - RecyclerView adapter not notifying index changes after item removal - Click listener bound to old position before list update - UI state and data state out of sync after dismissal This is only an observation and not a confirmed root cause.

12. NOTES

This observation was identified during normal usage of the application. No security testing, intrusive actions, unauthorized access attempts, or exploitation techniques were performed. This report is shared solely to help improve product quality and user experience.

SEVERITY REFERENCE

SEVERITY LEVEL	DESCRIPTION
Critical	Application is unusable.
High	Major functionality affected.
Medium	Functionality works but UX affected.
Low	Minor issue, minimal impact.

Prepared as part of independent QA testing and product quality analysis.
